

CLAIMS

1. A weatherseal, especially for sealing a door, a window pane or roof of a motor vehicle, including a base body made of a first elastomeric material and comprising a sealing portion as well as a fastening portion, said fastening portion being joined to an adhesion body defining a material positive connection of said base body to a component, wherein said adhesion body is made of a second elastomeric material having a cellular structure and comprising a contact surface to which an adhesive is applied, base body and adhesion body being coextruded.
2. The weatherseal as set forth in claim 1, wherein said second elastomeric material is cellular rubber.
3. The weatherseal as set forth in claim 1, wherein said first elastomeric material is a thermoplastic elastomer, ethylene-propylene dien rubber or a silicon-containing plastics.
4. The weatherseal as set forth in claim 1, wherein said adhesive is formulated for a durable tack.
5. The weatherseal as set forth in claim 1, wherein said contact surface is covered by a peel-off film.
6. The weatherseal as set forth in claim 1, wherein said contact surface of said adhesion body protrudes from the plane of said fastening portion.
7. The weatherseal as set forth in claim 1, wherein said fastening portion comprises a fastening lip on which said adhesion body is arranged.

8. The weatherseal as set forth in claim 1, wherein said sealing portion comprises a hollow chamber.
